DETAILED ACTION

Election/Restrictions

Applicant's election of Invention of Embodiment I of Figures 1-4, Claims 7-9, 12 and 14, in the reply filed on 02/23/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant's election without traverse of Invention of Embodiment I of Figures 1-4, Claims 7-9, 12 and 14, in the reply filed on 02/23/05 is acknowledged.

Claim 12, however, is not belong to elected embodiment and claims 1-6, 10-11, 13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Invention, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 02/23/05.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Application/Control Number: 10/705,516

Art Unit: 2811

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Carichner (PN 5,550,403).

Carichner discloses, as shown in Figures 1-3, an electronic device, comprising:

a plastic housing (12,14) having an external contact side (26) [Col. 4, lines 31-44]; external contact elements (22,24) projecting from the plastic housing on the external contact side, each of the external contact elements having an internal section (portion of 24 inside housing 14) with an internal core (inner portion of 24) and an internal coating (outer portion of 24), the internal section being disposed in the plastic housing, each of the external contact elements having an external section (portion of 24 outside housing 14) with an external core (inner portion of 24) and an external coating (outer portion of 24), the external section projecting from the plastic housing, and the internal section having an anchoring region and the external section having at least one external contact region tapering away from the external contact side.

Regarding claim 9, Carichner discloses the external contact region of at least one of the external contact elements has a substantially conical shape, a substantially pyramidal shape, or a substantially hemispherical shape.

Regarding claim 10, Carichner discloses the external core and the internal core are formed of an identical core material.

Application/Control Number: 10/705,516 Page 4

Art Unit: 2811

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all 4.

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

such that the subject matter as a whole would have been obvious at the time the invention was made to a person

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the

manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Carichner (PN

5,550,403).

Carichner discloses all of the claimed limitations except material of external coating. However,

it would have been obvious to one of ordinary skill in the art at the time the invention was made

to form the device of Carichner having the materials as that claimed by Applicant, since it has

been held to be within the general skill of a worker in the art to select a known material on the

basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin,

125 USPO 416.

5. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Carichner (PN

5,550,403) in view of Fujita et al. (PN 5,485,039).

Carichner discloses the claimed invention including the electronic device as explained in the

rejection above. Carichner does not disclose the identical core material is selected from the

group consisting of copper. However, Fujita et al. discloses an electronic device comprising an

external contact (6) having an identical core material selected from the group consisting of

copper. Note Figures 1-2, 9-10, and Col. 4, lines 35-36 of Fujita et al.. Therefore, it would have

Application/Control Number: 10/705,516

Art Unit: 2811

Page 5

been obvious to one of ordinary skill in the art at the time the invention was made to form the

external contact of Carichner having the identical core material is selected from the group

consisting of copper, such as taught by Fujita et al. since copper has higher conductivity and it is

easier to form.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Hung K. Vu whose telephone number is (571) 272-1666. The

examiner can normally be reached on Mon-Thurs 6:00-3:30, alternate Friday 7:00-3:30, Eastern

Time.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor. Eddie C. Lee can be reached on (571) 272-1732. The Central Fax Number for the

organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding

should be directed to the receptionist whose telephone number is (703) 308-0956.
